Course Overview

NEBOSH International Diploma is a qualification for aspiring health and safety professionals, building directly upon the foundation of knowledge provided by the NEBOSH International General Certificate in Occupational Health and Safety. The Diploma is designed to provide students with the expertise required to undertake a career as a health and safety practitioner and also provides a sound basis for progression to postgraduate study.

Topics

UNIT 1A: Managing health and safety
UNIT 1B: Hazardous agents in the workplace
UNIT 1C: Workplace and work equipment safety
UNIT DN1: Practical application of health and safety theory

Benefits

• Promotion
• Possible pay rise
• The qualification meets the academic requirements for application for Graduate Membership (Grad IOSH) of the Institution of Occupational Safety and Health
• This is the first step to becoming a Chartered Health and Safety Practitioner as a Chartered Member of IOSH (CMIOSH).
• allows holders to use the designatory letters DIPNEBOSH after their name

Course Schedule – 30 days

“Those who are planning to shift their career towards health and safety even without any experience at all and also to those who want to upgrade their career in health and safety, the right place is QHSE International. I am very sure that you will not regret it. It is not just a training institute but you are very much welcome to be part of the family.” – Dave Castillo
Course Overview

The NEBOSH International General Certificate in Occupational Safety and Health is a globally recognized qualification in health and safety.

The course is intended to provide managers, supervisors and employees a broader knowledge and understanding of health and safety principles and practices.

NEBOSH IGC provides effective and vital health and safety knowledge of risk management at any employment sector in accordance with international standards.

This course is also available in Arabic.

Topics

There are 3 Units that needs to be passed to achieve the NEBOSH IGC certification:

1. Management of Health and Safety Unit (GC 1)
2. Controlling Workplace Hazards (GC 2)
3. Practical Application (GC 3)

Benefits

This course is aimed at managers, supervisors, and employees who are responsible in ensuring safety as part of their day to day duties. This will provide them the know-how in executing their duties in any country and in any kind of organization. This course is suitable for individuals who wish to embark on a career in health and safety, providing a sound basis for NEBOSH Diploma.

"QHSE gives the quality knowledge to be practised at field. From my heart and my family, I thank Sir Billy for his effort. I have nothing to offer him but I hand over his work, life expectation and everything to the all might GOD for his Brilliant work." – Thoya Kafadzi

Course Schedule – 10 days

-“QHSE gives the quality knowledge to be practised at field. From my heart and my family, I thank Sir Billy for his effort. I have nothing to offer him but I hand over his work, life expectation and everything to the all might GOD for his Brilliant work.” – Thoya Kafadzi
Course Overview
This 5 day course is a professional qualification that allows individuals to gain a good understanding of the operational safety requirements in the oil and gas environment, both onshore and offshore. This Certification focuses on the importance of process safety management in the oil and gas industry. The syllabus takes a risk management approach based on best practices and international industry standards.
This course is designed for health and safety professionals who need to ensure and understand safety in the working environment, as well as needing an appreciation of hydrocarbon process safety. It is highly recommended that delegates have an existing underpinning knowledge of operational process safety issues or have taken the NEBOSH International General Certificate.

Topics
Element 1: Health, Safety and Environmental Management in Context
Element 2: Hydrocarbon Safety 1
Element 3: Hydrocarbon Process Safety 2
Element 4: Fire Protection and Emergency Response
Element 5: Logistics and Transport Operations

Benefits
This course is aimed at managers, supervisors, and employees who are responsible in ensuring safety as part of their day to day duties in the oil and gas industry. This would give them the confidence to effectively perform their day to day operations and exercise process safety management. Aside from practical benefits, delegates will also have an associate membership in the International Institute of Risk Management, allowing them to use AIIRSM after their name.

ISO 9001 (QMS) Lead Auditor
This training program will teach students how to build the essential knowledge to audit a QMS based on ISO 9001 and to administer a team of auditors by executing extensively recognized audit procedures, principles, and techniques.

Certified OHSAS 18001 Lead Auditor
This training will teach participants how to develop the necessary expertise to audit an Occupational Health and Safety Management System and to administer a team of auditors by executing widely recognized audit procedures, principles, and techniques.

ISO 14001 (EMS) Lead Auditor
This training will teach students how to develop the required knowledge and skills to audit an Environmental Management System based on ISO 14001 and to administer a team of auditors by executing extensively recognized audit procedures, principles, and techniques.

Benefits
There are numerous benefits reported by companies who have been ISO certified such as product improvement and better service quality. This has led to satisfied customers aiding business retention and new businesses. There are also clearer company objectives and process improvements which is evident in having lesser error rates which has improved employee productivity and waste reduction.
Course Overview
This course is a perfect introduction to health and safety. It provides day-to-day understanding of the management of health and safety in the workplace. It improves the safety culture in your organization, by equipping your workforce to identify and deal with hazards at work helping to reduce accidents and achieving cost savings for the business.

This course is a perfect introduction to health and safety. It provides day-to-day understanding of the management of health and safety in the workplace. It improves the safety culture in your organization, by equipping your workforce to ability to identify and deal with hazards at work helping reduce accidents and achieving cost savings for the business.

UNIT HSW1: Workplace Safety Foundations
UNIT HSW2: Workplace Risk Assessment

Benefits
The NEBOSH Health and Safety at Work qualification is not only for health and safety professionals but for everyone who wants to understand the principles of health and safety as part of their job. For example, team leaders, supervisors, HR Professionals, facilities managers, etc. This gives the workforce vital health and safety know-how so they can make a difference and help reduce accidents, control costs, protect the organization’s reputation and avoid legal penalties.

IOSH Managing Safely
Course Overview
This intensive three day course is designed for managers, supervisors, and any individual with responsibility in health and safety in any sector and any organization. This gives them the necessary knowledge and confidence to perform responsibility in managing health and safety. Managing Safely focuses on the development of practical safe systems of work. This course is also available in Arabic.

Topics
• Introduction to Managing Safely
• Assessing risks
• Controlling risks
• Understanding your responsibilities
• Identifying hazards
• Investigating accidents and incidents
• Measuring performance
• Protecting the environment

I think that I got sufficient instructions to be certified for IGC. I appreciate my teacher who is an extraordinary human being who shares a lot of his wisdom with us. Billy is a good example of best teacher!"

– Hari Rawat
Course overview
Medic First Aid is recommended for all individuals. This training provides participants with knowledge and basic skills on how to properly respond immediately to workplace injuries or medical emergencies. It is the first step toward learning how to help ensure the safety of your family, friends, and co-workers. The accreditation certificate is recognized for up to two years and is awarded upon completion of the one day training course.

Topics
• Emergency First Aid Care
• Recognising an Emergency
• Deciding to Help
• Personal Safety
• Assessing for Response
• Mechanism for Spinal Injury
• Activating Emergency Medical Services (EMS)
• Basic Life-Supporting Skills
• Airway—Head-Lift, Chin-Lift
• Clearing the airway—Long Roll
• Protecting the Airway—Recovery Position
• Breathing—Ventilation Mask
• Breathing—Ventilation Shield
• Circulation—Chest Compressions

Benefits
This course will discuss theories and practical application. Being certified with Medic First Aid will ensure that the right methods of administering medical assistance are provided during incidents. It affords people with the ability to provide help during various emergency situations because when you are knowledgeable you become more than just a bystander in an emergency situation, you can also save lives.

Learning Outcomes
• Design a training course targeted for adult learners
• Plan the delivery of a course by ensuring that all the key elements of effective training are present
• Learn how to communicate one’s message effectively
• Develop techniques to overcome barriers to learning
• Prepare and deliver a training session
• Learn to construct assessments to validate the learning
• Gain techniques for providing encouragement and coaching during the training process
• Create post-course evaluation forms
• Evaluate their peers and also receive feedback from them during class
We’re a global leader in compliance and work-based learning and apprenticeship qualifications, regulated by Ofqual, Qualifications Wales, SQA Accreditation, the Council for the Curriculum, Examinations and Assessment (CCEA), and the Security Industry Authority (SIA).

We’re also one of the UK’s 5 largest awarding organisations and the leading awarding organisation for compliance qualifications covering subjects such as food safety, health and safety, and security.

We provide over 250 work-based learning, apprenticeship and compliance qualifications to thousands of approved training centres, spread across 50 countries. These cover multiple sectors such as retail, health and social care, finance, customer service, rail and engineering, hospitality, logistics, aviation and many more.

Courses Approved

Level 5 NVQ Diploma in Occupational Health and Safety

Level 5 NVQ Diploma in Occupational Health and Safety Practice are aimed at those who wish to develop their skills and knowledge in managing health and safety for the workplace. Ideal for those who will have an autonomous role in their organisation for managing health and safety policy and practice, with direct report to or be part of the senior management team.

This level is ideal if you’re responsible for developing and applying health and safety procedures day-to-day in your organisation. You may be a staff member, supervisor or manager looking to improve your knowledge and skills.

To earn a qualification, you must complete nine mandatory units, including:
- Promote a positive health and safety culture
- Develop and implement effective communication systems for health and safety information
- Maintain knowledge of improvements to influence health and safety practice.

The Level 5 NVQ Diploma in Occupational Health and Safety Practice can be used as entrance to IOSH Graduate Membership the National Examination Board in Occupational Safety and Health (NEBOSH).

“QHSE was really a fantastic organization set up to help all these students meet up with standard international skills and knowledge on every field you are trained with. Its a best experience and well comfortable atmosphere to enjoy your period of learning in achieving your A1 grade certificate under the international management” – Sure Mikel

“I did extensive research to choose an institution for my NEBOSH IGC as I wanted to choose the best institution in the market. I finally chose QHSE international and I am glad I did as I found QHSE international to be the best of the best because they have a very professional and talented team including trainers and administration staff who guided me through every step with dedication and honesty. I also loved the friendly and knowledgeable environment that the institute provides to its students. As a result, I successfully completed my NEBOSH IGC. I would highly recommend QHSE international to anyone who are looking for Occupational Health and Safety courses.” - Zeeshan Younas
LEVEL 6 INTERNATIONAL DIPLOMA IN OCCUPATIONAL SAFETY AND HEALTH

BSC IDipOSH is designed for health and safety professionals wanting to advance their professional career or undertake further postgraduate study, the International Diploma in Occupational Safety and Health covers all the aspects of occupational health and safety practice, including risk management, occupational health, promoting a positive health and safety culture and preparing a business case for investment in health and safety.

During the course, delegates will be taught how to promote and embed health and safety in an organisation’s culture, prepare an organisation for investments in health and safety, and secure senior management’s commitment towards health and safety implementation. They will also develop a thorough understanding of international laws and legal frameworks relating to health and safety.

Course Contents
- Implications of global trends for the environment, society, the economy and for organisations
- Sustainable business/governance principles
- Environmental Principles
- Major policy and legislation
- Major tools, techniques, systems and practices to improve sustainability performance
- The role of innovation in developing sustainable products, services and solutions
- Data collection, analysis and evaluation
- Research and planning for sustainable solutions
- Effective communications and feedback
- Stakeholder engagement
- Tools and techniques to identify opportunities and risks
- Environmental and sustainability performance improvement

IEMA Foundation Certificate in Environmental Management

Provides a solid foundation of environment and sustainability knowledge to build on. It is aimed at staff who have recently become involved in environmental management.

"Thank you Billy Feghali and the entire QHSE INTERNATIONAL for taking the time to talk and walk with me for that long journey. I sincerely appreciate the time you Billy spent reviewing and coaching my career goals and recommending strategies for achieving them. Your advice was very helpful and gave me a new perspective on available opportunities. I also take time to appreciate Nikki, Paula and Eldhose bhai for their effort to connect me with others in QHSE Network." – Peter

"QHSE International, from registration to training; it was a very positive experience for me. This Institute goes the extra mile for the students, the classes and instructors are second to none!" – Samrah Khan
Public Health and Safety

Health related establishments should develop and implement appropriate training programs as per the requirements of public health & safety Department of Dubai Municipality. Persons in charge of health & safety must conduct a training needs assessment of all the personnel in the establishment such that appropriate and adequate training programs are developed for all employees and implemented. After the training, there should be adequate instruction and supervision of personnel and ongoing monitoring of health & safety practices and behavior.

1. General Requirements
   a. All staff working in a health related establishment must be formally trained on health & safety to a level appropriate to the type and nature of work they do.
   b. Staff should be trained in health & safety to a level appropriate to the job they perform. Such trainings should also be based on the level of health & safety risk in the health related establishment. Factors for assessing the level of health & safety risk include:
      1. Ladies or Gents salon
      2. Kids Hairdressing salon
      3. Oriental Bath for Ladies or Gents
      4. Tanning center
      5. Fitness Center for Ladies or Gents
      6. Relaxation Massage center Ladies or Gents
   c. Formal health & safety training should be obtained from a trainer approved by the Department.
   d. The Certificate of training for the staff shall be retained in the establishment and should be provided to the representatives from the Health Control section when required.
   e. The Health & safety Inspection Officer assigned to inspect the Health related establishment can recommend the withdrawal of the certificate and recommend retraining and certification if the staff is found ineffective in managing Health & safety.

Basic Food Hygiene

People who handle food are those who are involved in any activity in your business that involves food or surfaces likely to come in contact with food. It covers the people whose work involves manufacturing, processing, preparing (such as chopping, cooking, thawing), delivering, servicing, transporting or packing food and the people who clean the premises and equipment.

What Will You Learn
- Introduction to food safety
- Microbiology (Multiplication and survival hazards)
- Contamination hazards & controls
- Food poisoning
- Personal hygiene
- Food premises & equipment
- Cleaning and disinfection
- Pest management
- Food Storage and Requirements
- Food Items Receiving to Dispatch Hazards & Controls

"QHSE undoubtedly the pioneer institute in HSE field in Dubai. As an institute they have shown their core responsibility and commitment towards student for their success. Till I start studying here I felt I am at the right place and it will certainly I will succeed. The proficiency of QHSE helped me to achieve my NEBOSH certification as they gave me infinite support and motivation. And financially the fee is cheap compared to the service that they have providing.” – Manu K Kuttan
Registered Safety Officer

The Registered Safety Officer (RSO) is knowledgeable of the fundamentals of occupational Health and Safety. The RSO is generally responsible for the day-to-day activities of managing a company’s health and safety program (this is an entry-level certification).

What Will You Learn

- Safety Terminology
- Management’s Responsibilities
- Hazard Recognition and Control Measures
- Fire and Life Safety
- Electrical Safety
- Office and Fleet Safety
- Compressed Gas Cylinders
- Hazardous Materials / Waste
- Safety Training
- Motivation
- Safety Inspections
- Accident Investigations
- Documenting Safety

This 5-day training is suitable for individuals with a responsibility in Health and Safety.

Registered Safety Manager

As an IBOEHS Registered Safety Manager, you will focus more on a higher level of responsibility and authority. Making decisions as well as the duties of mentoring safety officers in addition to understanding of the fundamentals of occupational health and safety.

What Will You Learn

- Leading, Managing and Following
- Critical Thinking
- Assertive Communication
- Delegating
- Time Management
- Stress Management
- Handling Conflicts
- Substance Abuse Awareness
- Evaluating Staff Performance

This 3-day training is suitable for individuals with a managerial responsibility in Health and Safety. This is for Registered Safety Officer (RSO) qualified or Safety Officers with 3 years proven experience.

Registered Safety Professional

The Registered Safety Professional (RSP) provides recommendations and actions for the prevention of accidents and/or incidents, which may cause injury or illness to people, damage to property, or destruction to a community (environmental). They employ various analytical methods to identify physical and health hazards.

In addition to having a working knowledge of the fundamentals and application of occupational health and safety, a Registered Safety Professional must be knowledgeable of science (physical, chemical, biological and behavioural), mathematics, business management, insurance, and performance of specially operation, such as construction, manufacturing, healthcare, etc.

This training is suitable for individuals with a responsibility in Health and Safety. This is for RSM / Bachelor degree in Occupational Health and Safety/A level 6 diploma in OSH/An associate degree in OSH/Safety Officers with 5 years proven experience.

Other IBOEHS Accredited Courses

- OSHA 30 HRS General Industry
- OSHA 30 HRS Construction Industry
- Registered Environmental Safety Officer
- Registered Healthcare Safety Officer
- Registered Radiation Safety Officer
- Registered Mine Safety Officer
- EHS Diploma in Safety Management
- Train the Trainer
- Infection Control manager

Since International Board of Environmental Health and Safety programs are following OSHA standards. Unlike other awarding bodies, IBOEHS courses are based on OSHA standards, IBOEHS certificate holders will be an asset to the organization as they are more on applied health and safety so that organization can minimize their work place accidents/incidents effectively.
Working at Height

Working at height remains one of the biggest causes of fatalities and major injuries. Common cases include falls from ladders and through fragile surfaces. ‘Work at height’ means work in any place where, if there were no precautions in place, a person could fall a distance liable to cause personal injury (for example a fall through a fragile roof).

Manual Handling

Manual handling relates to the moving of items either by lifting, lowering, carrying, pushing or pulling. Injuries can be caused because of the amount of times you have to pick up or carry an item, the distance you are carrying it, the height you are picking it up from or putting it down at and any twisting, bending stretching or other awkward posture you may get in whilst doing a task.

Scaffold Safety

Anyone erecting a tower or Fixed scaffolding should be competent to do so and should have received training under an industry recognised training scheme e.g. Prefabricated Access Suppliers’ and Manufacturers’ Association (PASMA) or under a recognised manufacturer or supplier scheme.

Fire Warden

Most fires are preventable. Those responsible for workplaces and other buildings to which the public have access can avoid them by taking responsibility for and adopting the right behaviours and procedures. This course covers general advice on fire safety and also provides guidance on substances that cause fire and explosion.

Risk Assessment

This site provides guidance and tools to help businesses understand what they need to do to assess and control risks in the workplace and comply with health and safety law. Although written with small businesses in mind, the course is relevant to all businesses.

Accident Investigation

You need to prepare to deal with unexpected events in order to reduce their consequences. Workers and managers will be more competent in dealing with the effects of an accident or emergency if you have effective plans in place that are regularly tested. An effective investigation requires a methodical, structured approach to information gathering, collation and analysis.

Ergonomic / Workstation Assessment

People are involved in all aspects of work, which is why QHSE recognises the importance that human factors can play in helping avoid accidents and ill-health at work.
Confined Space

A ‘confined space’ is a place which is substantially (though not always entirely) enclosed, and where there is a risk of death or serious injury from hazardous substances or dangerous conditions (such as a lack of oxygen). These can include storage tanks, silos, reaction vessels, enclosed drains and sewers, open topped chambers, ductwork and poorly ventilated rooms.

Control of substances hazardous to health (COSHH)

COSHH is the law that requires employers to control substances that are hazardous to health. Most businesses use substances, or products that are mixtures of substances. These could cause harm to employees, contractors and other people. Sometimes substances are easily recognised as harmful. Common substances such as paint, bleach or dust from natural materials may also be harmful.

Supervising Safely

Many people young and old are likely to be new to the workplace and in some cases will be facing unfamiliar risks from the job they will be doing and from their surroundings. An employer will need to consider how much training is necessary. A proportionate approach is needed, for example a low-risk business would not be expected to have a need for lengthy technical training.

Root Cause Analysis

This course will help you engage your workers to find the root causes of any health and safety issues you have on site and learn from your mistakes. Leadership and worker involvement strategies should be used to prevent accidents, ill health, harm and loss happening on site. Leaders need to learn from those involved in the work activities, to gather information about conditions on a site.

H2S Safety (Teex Approved)

This course provides guidance for duty holders on detecting and managing hydrogen sulphide (H2S) hazards in hydrocarbon processing systems. As reservoirs begin to water out, hydrogen sulphide can become an issue when processing returning fluids. The gas is toxic in relatively low concentrations and the risks to the workforce need to be addressed as soon as its presence becomes known.

Rigging, Slinging & Banksman

All lifting operations involving lifting equipment must be properly planned by a competent person, appropriately supervised and carried out in a safe manner. In most cases, lifting equipment is also work equipment so the Provision and Use of Work Equipment Regulations (PUWER) will also apply (including inspection and maintenance).

Emergency Preparedness

Workplaces need a plan for emergencies that can have a wider impact. Special procedures are needed for emergencies such as serious injuries, explosion, flood, poisoning, electrocution, fire, release of radioactivity and chemical spills. This course will assist you in writing an emergency plan if a major incident at your workplace could involve risks to the public, rescuing employees or coordinating emergency services.

Other Courses We Offer

• Basic Food Hygiene
• Person in charge Level 2 & 3
• Essential Food Safety
• Sharjah Food Program
• GHP Manager & Staff
• Advance Food Hygiene
• ISO/HACCP Awareness
• ISO/HACCP Internal Auditor
• ISO/HACCP Implementation
• TQM implementation
